## TITLE INDEX

Angeleseu polynomials, generalised: some properties (Rangarajan), 65.

Appell-polynomials and the functions $F(Z, \alpha)$, on some infinite series involving, I (Rangarajan), 153.

Barium ion, crystal co-ordination of the (Manohar and Ramaseshan), 317.

Beta transitions to even-even nuclei, allowed, regularity in enhancement phenomenon of (Brahmavar and others), 134.

Chalcones as inorganic analytical reagents, II (Syamasundar), 259.

Crystal, a method for remounting, along a specified direction (Singh), 122.

Crystals, rapid alignment of, in X-ray cameras (Ramaswamy and Ramaseshan), 115.

Crystal symmetry and physical properties: application of group theory (Bhagavantam and Pantulu), 1.

CuBr molecule, a new band system of (Rao and Apparao), 57.

Di-caesium uranyl nitrate at 77° K., on the fluorescence spectrum of (Dixit), 90.

*Diospyros melanoxylon* Roxb., chemical examination of the leaves of (Gupta and Rao), 36.

Dipole moments of some derivatives of *para*-xylene—a possible intramolecular hydrogen bonding (Anantakrishnan and Rao), 201.

Elastic constants of trigonal crystals, determination of the, evaluation of two methods for the (Mayer and Hiedemann), 147.

Heats of combustion of some symmetrical dialkyl ureas and their corresponding alkyl carbamates (Venugopala Charlu and Rao), 31.

Hydrogen bond, influence of the, on the N-H stretching frequencies in amino-acids (Krishnan and Krishnan), 11.

Hydromagnetic waves, small amplitude, in compressible medium with Hall current (Uberoi and Devanathan), 42.

Hypersonic flow past a sphere (Nath), 396.

Iron electrodeposits, effect of codeposition of foreign material on the structure of, an electron-diffraction study of the (Reddy and Wilman), 253.

Low and high temperature optical goniometry of hygroscopic crystals, an apparatus for (Aravamudan and others), 25.

Low temperature attachment to the Weissenberg goniometer (Singh and Ramaseshan), 20.

Metal-amino acid complexes, studies in the polarography of, I, II (Rao and Subrahmanya), 165, 185.

N-methyl acetamide, vibrational spectra and normal vibrations of (Venkata Ramiah and Venkata Chalapathi), 242.

Non-Newtonian fluid, slow rotation of a sphere in a, with or without suction or injection (Bhatnagar), 99.

Optical glasses, a group of, the elastic properties of, by the pulse echo set-up (Viswanathan), 425.

Oxidation, studies in, XI (Anantakrishnan and Jayaraman), 416.

Point group, crystal form and complete conjugate set of subgroups of (Rao), 313.

Polarised light, rotating elliptic analysers for the automatic analysis of, I, II (Rajagopalan and Ramaseshan), 297, 379.

Probability and prime numbers (Ducray), 159.

Raman spectrum of acetonitrile (Neelakantan), 422.

Sporadic E, blanketing, in the Indian equatorial region, a study of (Bhargava and Subrahmanyan), 271.

Sporadic E, equatorial, ionization and electrojet effect of geomagnetic disturbances (Kotadia), 352.

Titanium (IV) complex with 3-benzyl 4, 5-dihydroxycoumarin, spectrophotometric studies of (Jain and Kumar), 265.

Titanium, studies in the separation and estimation of, using vanillin as an analytical reagent (Jain and Singh), 85.

Vibration, mean amplitudes of: bent symmetrical $XY_2$ molecules and groups (Rajalakshmi), 51.

Vibration, mean amplitudes of: $SeO_3$ and $ClF_3$ (Purushothaman), 431.

Vision, the new physiology of, I, II, III, IV, V, VI, VII (Raman), 139, 143, 211, 287, 292, 369, 375.

X-ray spectra, field theoretical effects in (Krishnan and Nigam), 75.

Yawed cylinder with Schubauer's ellipse as section, an infinite, investigation of secondary flow and the related instability on (Singh and Sinha), 219.
